SUPPORTED LEARNING

Plan Your Studies!

Study time is any time you are doing something related to your course work. It can be completing assigned reading, working on a paper or project, or studying for a test. Make sure to schedule specific times throughout the week for your study time – and stick to the plan!

I learned so much from these courses and I'm experiencing more of office work than the work I'm supposed to do.

I enjoy my studies and experiencing office work.

Brilliant Maisiri

Hi there my name is **Brilliant Maisiri** and I am your lecturer for **ICB Financial Accounting**, I would like to tell you a little bit about myself so that you can get to know me.

I am young, funny and a hard worker. My strength is in figures and I am extremely passionate about analysing government policies and how they impact the economy. Because of these characteristics, I have developed a love for accounting, economics and taxation.

My Qualifications

I am the proud holder of an Honours Degree in Administration, and I am also a member of CIS (Chartered Secretaries Southern Africa is a division of ICSA which is the global Institute of Chartered Secretaries and Administrators)

My Experience

I have three years of lecturing experience in Accounting and Economics courses

Why I love teaching

What I really enjoy about lecturing is that it keeps my mind sharp because I constantly have to learn new thing and do research so that I am confident in what I am discussing with my students.

My Studies

I am a holder of Honours Degree in Administration specialising in Public Finance Management, Government Policies, and Economics.

Because of my passion with figures, I enrolled with CIS (Chartered Secretaries Southern Africa is a division of ICSA which is the global Institute of Chartered Secretaries and Administrators) Accounting Board, when I was still on my second year at the University.

I was then doing two programmes at the same time, which was challenging but it was good for my career to be able to learn how to work under pressure and still be able to get results. Currently I am still working to complete my qualification with CIS before I enrol for an MBA.

My Groups

I am proud to run the ICB Financial Accounting courses, I love lecturing for these subject because I have a head for figures, and I enjoy interacting with students.

I feel honoured when I have the opportunity to impart knowledge on someone which will be helpful to their future. Whichever career path I will take in future, lecturing in Accounting and Economics will always remain a huge part of my life.
