SUPPORTED LEARNING

Edison Mutematemi

Hi there my name is **Edison Mutematemi** and I am your lecturer for **Entrepreneurship, Event Management and Project Management**. I would like to tell you a little bit about myself so that you can get to know me.

I am an activist interested in many areas that affect human life, but most notably areas to do with entrepreneurship and business. I hope to use all my talents, knowledge, strength, potentials, wisdom, opportunities, wealth, health, connections, and everything that I possess for the benefit of mankind at large, especially the poor and the underprivileged in our societies.

My Qualifications

I have a Bachelor of Technology in Business Management specialising in Entrepreneurship. Currently my interests lie in pursuing a Master of Technology degree in Business Administration specialising in Entrepreneurship.

My Experience

Being an educator is the background foundation of my career. I started as high school relief teacher for two years, follow that I became a tutor for Entrepreneurship and Business Management department and now I am a lecturer of entrepreneurship at Skills Academy.

Why I love teaching

Coming from a family with teacher, I was inspired to change peoples' lives, this is a passion that I learned from my guardians.

It's a rewarding experience to be a lecturer at Skills Academy; facilitating the process of learning and sharing of knowledge across the world. I believe my responsibilities can make a positive change in different societies.

My Studies

My favourite memory from university is that, it was my birthday the day registered and started university as a fresher and I was a bit worried about how my first birthday away from home would go. However I end up enjoying the day with new friends whom I met that day. Six years later we are still good friends. Which shows you that your studies can impact your life forever – not only academically but socially as well.

My Groups

I am proud to run the Entrepreneurship, Events Management and Project Management courses.

I love using my knowledge to facilitate the learning and enjoy sharing knowledge across the world. I take my responsibilities as a lecturer seriously, and I believe by teaching people how to become entrepreneurs that I can change their lives for the better.

Don't try to cram all your studying into one session!

Successful students space their work out over shorter periods of time and never try to cram all of their studying into just one or two sessions. If you want to become a successful student then you need to learn to be consistent in your studies and to have regular, yet shorter, study periods.

Everyone was nice and eager to help. Please recognize the people at call centre as well, as they had a good attitude and pleasant to talk to.
