Liberty S Mazumba

Hi there my name is **Liberty S Mazumba** and I am your lecturer for **ICB Business Management** and **Project management**, I would like to tell you a little bit about myself so that you can get to know me.

I am a young energetic young man who is passionate about academia and sports. Being from a humble background, I am very keen to see what life will be like when I pursue my dreams. I am interested in the dynamic world of academics and business and this helps to keep me posted on the current affairs.

Qualifications

I have a Bachelor of Technology in Project Management and I am currently studying a Master of Technology in Business Administration specializing in Project Management, so I am also a student – just like you!

Experience

Before I became a lecturer at Skills Academy I worked as an Assistant Procurement Clerk and I have also worked as a Logistics Officer.

Why I love teaching

I love being a lecturer because it is a profession that always keeps one up to date with current affairs in the world.

I also love that it allows me to meet lots of different people by interacting with students who come from a variety of diverse backgrounds, which makes teaching very interesting very interesting for me.

The world of academics keeps me posted all the time. Business Management is a compelling and progressive course which helps in students to develop their managerial competencies in the corporate world.

My Studies

During the course of my studies, I was exposed to a diverse platform which provides a lot of obstacles but this turned to be a blessing in disguise.

Challenges presents risk but if approached positively, they can be opportunities hence today I am planning to pursue my studies further by studying another degree in a different field. I am also seeking to acquire my PHD within the next 5 years.

My Groups

I am proud to run the ICB Business Management and Project Management courses.

I love working with these groups because I am qualified in the Project Management area and that's where my passion lies, so I am always excited to share my knowledge with my students.

Always review your notes before starting an assignment!

Always make sure to take good notes in while you are studying. Review your notes thoroughly to make sure you know how to complete the assignment correctly. Reviewing your notes before each study session will help you remember important subject matter learned during the day, and make sure studying targeted and effective.

After my horrible experience with INTEC I took the risk of going with you guys. But wow. On first call after query I received an e-mail, then a call, and all was done and arranged. Received study material 3 days after an SMS was sent, saying I was going to get it. Handed assignments in and 2 days later I got my feedback regarding it. You guys are great at what you do... Never change...
