SUPPORTED LEARNING

Embrace New Technologies

Now there are more options for personalising study that ever before. Whether it's through online tools, social media, blogs, videos or mobile apps, learning has become more fluid and user-centred! Take advantage and use these tools to help you.

My assignments are marked on time. I don't find myself waiting and phoning to find out if there is any progress on marking my assignments. I get encouraging feedback and time to comment, which is giving me time to look at possible errors made in marking.

Matilda Phompho

Hi there my name is **Matilda Phompho** and I am your lecturer for **all IT Courses** and **Child Day Care**. I would like to tell you a little bit about myself so that you can get to know me.

I am the first born daughter in a family of three, I have been married for eight years we thank God, he blessed us with a sweet son, I became a born again Christian in 2001 and am proud of it. Socially I love soccer and also love hospitality.

Qualifications

I am a holder of a Diploma in Information Technology

Experience

I have worked with several different organisations for eight years.

I first worked as the Microsoft Office trainer for Computer Land Limited, and then worked as an End-User support specialist for Broadband Digital Solutions and now that I have so much experience in IT I am working as an IT Lecturer for the Skills Academy.

Why I love teaching:

We are living in a digital world, with a major emphasis on Data Processing and Applied Information Technology. Technology has become a part of our everyday lives, and understanding how to function in environments that require the use of computers and the Internet is more critical now than ever before!

I am passionate about helping students by introducing them to IT and teaching them how to have and apply the knowledge in this digital era.

So, whether you plan to pursue a career in IT, or simply want to become more efficient with technology, I will be with you throughout all steps of your study journey.

My Studies

After completing my High School I had a strong desire to know how a computers work, I never had access to computers growing up but I admired one of our neighbours who knew how to operate a computer. I made a decision to be like her, so I looked for a place where I can do this. The first day I sat on the computer it was amazing! Even though we had to watch the Lecturer do everything for us I still loved it. Today I am extremely proud to have the Diploma in Information Technology.

My Groups

I am proud to run the IT and Child Day Care courses. I love teaching IT because that is what I studied myself, and I know them do it with passion.

I am a mother myself so I love children, it's amazing to me to see how every day we learn about child development and communicating with children. This has helped to apply the knowledge on my own child, I love that this course can help everyone, even parents.
